Dr. Harald Alfred Rehder, Zoologist Emeritus at the National Museum of Natural History of the Smithsonian Institution, and a leading authority on the systematics and biogeography of the molluscan fauna of Polynesia, died on November 10, 1996, of cardiac arrest. An eminent scholar, he enjoyed a long and distinguished career, and was highly respected by the international malacological community, as well as by the many amateur naturalists interested in mollusks.

Harald Rehder was born on June 5, 1905, in Boston, Massachusetts, the son of a botanist and curator at Harvard University's Arnold Arboretum. He grew up in the Boston suburb of Jamaica Plain, where he attended Roxbury Latin School. With the encouragement of his father and of Charles W. Johnson of the Boston Society of Natural History, his interest in natural history gradually became focused on mollusks. After earning a Bachelor of Arts degree in Chemistry from Bowdoin College in 1929, he entered Harvard University as William J. Clench's first graduate student in Malacology.

Prior to completing his degree at Harvard, he obtained a position as a Senior Science Aide to Dr. Paul Bartsch in the Division of Mollusks at the National Museum of Natural History in 1932. Harald Rehder received his Master of Arts degree in Malacology from Harvard University in 1933, and his Ph. D. in Malacology from George Washington University (Washington, DC) in 1934. His dissertation, "A contribution to our knowledge of the genus *Succinea* in North America" was completed under the guidance of Dr. Bartsch. After receiving his doctoral degree, he became an Assistant Curator in the Division of Mollusks in 1934, an Associate Curator in 1942, and succeeded Paul Bartsch as Curator in 1946. Dr. Rehder was named Senior Zoologist in 1965, and held this position until his retirement in June 1976. He continued, as Zoologist Emeritus, to publish popular books and research papers on mollusks until his death.

Dr. Rehder devoted an extraordinary amount of time and effort throughout his career to the care and curation of the National Collection of Mollusks. During the Second World War, Dr. Rehder and Dr. J. P. E. Morrison, also of the Division of Mollusks, completed the daunting task of identifying, documenting, and segregating thousands of type specimens of mollusks in preparation for

removal from the general collections to the caverns in Luray, Virginia, for safekeeping. Upon their return to the National Museum after the war, these collections remained segregated as the type collection. Dr. Rehder oversaw the move of the collections from the central portion of the museum to the newly constructed research wing in the 1960s, and continued to curate countless new acquisitions well into his retirement.

Dr. Rehder began his career working primarily on the systematics of land and freshwater gastropods, but soon expanded his work to include marine faunas. He took part in expeditions to the Caribbean early in his career, but his major research interest, the study of the molluscan faunas of the Central and South Pacific, developed during his participation in the Smithsonian-Bredin Expedition to French Polynesia in 1957. He was a member of the Pacific Science Board's expeditions to the Marshall Islands in 1960, and led additional expeditions to the South Pacific in 1963, 1964, 1967, 1969, 1970, and 1973, supported by grants from the National Geographic Society, The National Science Foundation, and by private donors. Dr. Rehder conducted field work at more than fifty islands and atolls during his career. The National Collection was enriched by over thirteen thousand lots and nearly one hundred thousand specimens that were collected during these expeditions.

Dr. Rehder served as advisor to Helen L. Hayes, Joseph C. Britton, and George Radwin, who completed their doctoral degrees in malacology at George Washington University between 1968 and 1972.

Harald Rehder was the last surviving founding member of the American Malacological Union (now the American Malacological Society). He served as President of this organization in 1940–41, was elected as Honorary Life Member in 1978 and Honorary Life President in 1985.

Dr. Rehder was a Fellow of the American Association for the Advancement of Science and the California Academy of Science, and a member of numerous professional societies, among them the Washington Academy of Sciences, the Biological Society of Washington, the Malacological Society of London, the Paleontological Society, the Society for Systematic Zoology, the American Littoral Society, the International Society for Reef Studies, and the Senckenbergische Naturforschende Gesellschaft. He

served as Editor of the *Journal of the Washington Academy of Sciences* from 1944–1946, as co-editor of *Indo-Pacific Mollusca* from 1959–1973, and on the editorial board of numerous scholarly publications.

He also belonged to many shell clubs, including Boston Malacological Club, and the Hawaiian Malacological Society. A Charter member of the National Capital Shell Club, he was elected as its first president in November 1960.

In addition he was a member of the Cosmos Club, The International Club of Washington, DC, The Explorers Club of New York City, and served on the Administrative Board of the Foundry United Methodist Church and its Susanna Wesley House, and was very active in the Homeless Mission. He enjoyed membership in the "Fossils," an organization of distinguished retired men.

Two genera and 24 species of Mollusca, 1 species of Foraminifera and 1 species of Pycnogonida have thus far been named in his honor.

His wife of 50 years, Lois Corea Rehder, died in 1988. He is survived by a daughter, Anne F. van Beek-Rehder, of Amsterdam, The Netherlands; a son, Alfred L. Rehder of Germantown, Maryland, and three grandchildren.

II. MOLLUSCAN TAXA OF HARALD A. REHDER

During his career Harald Rehder introduced 397 molluscan taxa, of which 58 were genus-level taxa (34 genera and 24 subgenera, 1 subgenus as a replacement name), and 339 were species-level taxa (320 as species, 19 as subspecies, 8 species as replacement names). These are

listed alphabetically, by category. Data for genus-level taxa include taxon, author(s), year of publication, journal and page number, type species, and family to which currently assigned. Data for species-level taxa include taxon (original combination), author(s), year of publication, journal, page number and illustrations, type material, type repository and catalog number, general type locality, and family.

Genus-level Taxa

Abarbatia Dall, Bartsch and Rehder, 1938, as a subgenus of *Barbatia* Gray, 1847. Bernice P. Bishop Museum Bulletin 153:29. Type species: *Barbatia (Abarbatia) oahua* Dall, Bartsch and Rehder, 1938, by original designation. Arcidae.

Achasmea Dall, Bartsch and Rehder, 1938, as a subgenus of *Lciochasmea* Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:147. Type species: *Solcardia thaanumi* (Pilsbry, 1921), by original designation. Galeommatidae.

Anguipecten Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:92. Type species: *Angui-*

pecten gregoryi Dall, Bartsch and Rehder, 1938, by original designation. Pectinidae.

Antemetula Rehder, 1943. Proceedings of the United States National Museum 93(3161):199. Type species: *Buccinum metula* Hinds, 1844, by original designation. Buccinidae.

Barbarca Dall, Bartsch and Rehder, 1938, as a subgenus of *Calloarca* Gray, 1857. Bernice P. Bishop Museum Bulletin 153:23. Type species: *Calloarca (Barbarca) hua* Dall, Bartsch and Rehder, 1938, by original designation. Arcidae.

Bartschia Rehder, 1943. Proceedings of the United States National Museum 93(3161):199. Type species: *Bartschia significans* Rehder, 1943, by original designation. Buccinidae.

Cadella Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:196. Type species: *Tellina lechiogramma* Melville, 1893, by original designation. Tellinidae.

Cerodrillia Bartsch and Rehder, 1939. Proceedings of the United States National Museum 87(3070):127. Type species: *Cerodrillia clappi* Bartsch and Rehder, 1939, by original designation. Turridae.

Cornuteredo Dall, Bartsch and Rehder, 1938, as a subgenus of *Teredo* Linné, 1758. Bernice P. Bishop Museum Bulletin 153:209. Type species: *Teredo (Cornuteredo) milleri* Dall, Bartsch and Rehder, 1938, by original designation. Teredinidae. [see comments under *Teredo milleri*]

Crassispirella Bartsch and Rehder, 1939, as a subgenus of *Crassispira* Swainson, 1840. Proceedings of the United States National Museum 87(3070):135. Type species: *Crassispira (Crassispirella) rugitecta* (Dall, 1918), by original designation. Turridae.

Cryptopecten Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:93. Type species: *Cryptopecten alli* Dall, Bartsch and Rehder, 1938, by original designation. Pectinidae.

Dallimurex Rehder, 1946, as subgenus of *Paziella* Jousseaume, 1880. The Nautilus 59(4):142. Type species: *Murex nuttingi* Dall, 1896, by original designation. Muricidae.

Desmaulus Rehder, 1943, as a subgenus of *Bicatillus* Swainson, 1840. Proceedings of the Biological Society of Washington 56:45. Type species: *Calyptaraca extinctorium* Lamarck, 1822, by original designation. Crepidulidae.

Diploplax Bartsch and Rehder, 1945, as a subgenus of *Martesia* Sowerby, 1824. Smithsonian Miscellaneous Collections 104(11):10. Type species: *Martesia (Diploplax) americana* Bartsch and Rehder, 1945, by original designation. Pholadidae.

Diplothyra Bartsch and Rehder, 1945, as a subgenus of *Martesia* Sowerby, 1824. Smithsonian Miscellaneous Collections 104(11):8. Type species: *Martesia (Diplothyra) smithii* (Tryon, 1862), by original designation. Pholadidae.

Dorisca Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:159. Type species: *Dorisca cookei* Dall, Bartsch and Rehder, 1938, by original designation. Veneridae.

Dysmea Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:173. Type species: *Solen occidentis* Gmelin, 1791, by original designation. Psammobiidae.

Egentclaria Rehder, 1980. Smithsonian Contributions to Zoology 289:93. Type species: *Terebra stylata* Hinds, 1844, by original designation. Terebridae.

Glyphicpithema Rehder, 1943. Proceedings of the United States National Museum 93(3161):196. Type species: *Natica idiopoma* Pilsbry and Lowe, 1932, by original designation. Naticidae.

Halopsephus Rehder, 1943. Proceedings of the United States National Museum 93(3161):191. Type species: *Halopsephus pulcher* Rehder, 1943, by original designation. Turbinidae.

Haumea Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:86. Type species: *Haumea juddi* Dall, Bartsch and Rehder, 1938, by original designation. Pectinidae.

Hawaiarca Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:27. Type species: *Hawaiarca rectangula* Dall, Bartsch and Rehder, 1938, by original designation. Arcidae.

Hitia Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:135. Type species: *Hitia ovalis* Dall, Bartsch and Rehder, 1938, by original designation. Sportellidae.

Kancoha Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:142. Type species: *Kancoha rosea* Dall, Bartsch and Rehder, 1938, by monotypy. Kelliidae.

Kona Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:148. Type species: *Kona bucki* Dall, Bartsch and Rehder, 1938, by original designation. Montacutidae.

Kurodina Rehder, 1969, as subgenus of *Musashia* Hayashi, 1960. Venus, The Japanese Journal of Malacology 27(4):128. Type species: *Musashia (Kurodina) smithi* (Sowerby, 1901), by original designation. Volutidae.

Leiochasmea Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:146. Type species: *Leiochasmea chaseax* (Pilsbry, 1921), by original designation. Galeommatidae.

Lissodrillia Bartsch and Rehder, 1939, as a subgenus of *Cerodrillia* Bartsch and Rehder, 1939. Proceedings of the United States National Museum 87(3070):129. Type species: *Cerodrillia (Lissodrillia) schroederi* Bartsch and Rehder, 1939, by original designation. Turridae.

Lonoa Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:178. Type species: *Lonoa hawaiiensis* Dall, Bartsch and Rehder, 1938, by original designation. Semelidae.

Loxoglypta Dall, Bartsch and Rehder, 1938, as a subgenus of *Jactellina* Iredale, 1929. Bernice P. Bishop Museum Bulletin 153:192. Type species: *Tellina obliquilineata* Conrad, 1837, by original designation. Tellinidae.

Mirapecten Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:84. Type species: *Mirapecten thaummi* Dall, Bartsch and Rehder, 1938, by original designation. Pectinidae.

Monilispira Bartsch and Rehder, 1939. Proceedings of

the United States National Museum 87(3070):137. Type species: *Monilispira monilifera* (Carpenter, 1857), by original designation. Turridae.

Nanopitar Rehder, 1943, as a subgenus of *Pitar* Römer, 1857. Proceedings of the United States National Museum 93(3161):188. Type species: *Pitar (Nanopitar) pilula* Rehder, 1943, by original designation. Veneridae.

Nenisca Rehder, 1939, as a subgenus of *Nenia* H. & A. Adams, 1855. Journal of the Washington Academy of Sciences 29(4):171. Type species: *Nenia (Nenisca) bartschi* Rehder, 1939, by original designation. Clausiliidae.

Nesobornia Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:136. Type species: *Solecardia ovata* (Gould, 1850), by original designation. Kelliidae.

Nodochila Rehder, 1980. Smithsonian Contributions to Zoology 289:79. Type species: *Zafra pascua* Hertlein, 1962, by original designation. Columbelloidae.

Paranenia Rehder, 1939, as a subgenus of *Nenia* H. & A. Adams, 1855. Journal of the Washington Academy of Sciences 29(4):173. Type species: *Nenia perarata* (von Martens, 1873), by original designation. Clausiliidae.

Particoma Bartsch and Rehder, 1945, as a subgenus of *Martesia* Sowerby, 1824. Smithsonian Miscellaneous Collections 104(11):5. Type species: *Martesia (Particoma) cuneiformis* (Say, 1822), by original designation. Pholadidae.

Paurodiscus Rehder, 1935, as a subgenus of *Pseudomalaxis* Fischer, 1885. The Nautilus 48(4):128. Type species: *Pseudomalaxis (Paurodiscus) lamellifera* Rehder, 1935, by monotypy. Architectonicidae.

Pectinistemma Rehder, 1940, as a subgenus of *Propilsbrya* Bartsch, 1906. Journal of the Washington Academy of Sciences 30(7):315. Type species: *Propilsbrya (Pectinistemma) kocstneri* Rehder, 1940, by original designation. Urocoptidae.

Phlycticoncha Bartsch and Rehder, 1940, as a subgenus of *Lyonsia* Turton, 1822. The Nautilus 53(4):137. Replacement name for *Phlyctiderma* Bartsch and Rehder, 1939, preoccupied by *Phlyctiderma* Dall, 1899. Lyonsiidae.

Phlyctiderma Bartsch and Rehder, 1939, as a subgenus of *Lyonsia* Turton, 1822. Smithsonian Miscellaneous Collections 98(10):12. Type species: *Lyonsia (Phlyctiderma) lucasana* Bartsch and Rehder, 1939, by original designation. Lyonsiidae. [see above].

Phycodrosus Rehder, 1943, as a subgenus of *Rissoella* Gray, 1847. Proceedings of the United States National Museum 93(3161):194. Type species: *Rissoella (Phycodrosus) caribaea* Rehder, 1943, by original designation. Rissoellidae.

Pitaremus Rehder and Abbott, 1951, as a subgenus of *Pitar* Römer, 1857. Revista de la Sociedad Malacologica

"Carlos de la Torre" 8(2):57. Type species: *Pitaria cordata* Schwengel, 1951, by original designation. Veneridae.

Policordia Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:217. Type species: *Policordia diomedea* Dall, Bartsch and Rehder, 1938, by original designation. Verticordiidae.

Privigna Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:160. Type species: *Privigna pilsbryi* Dall, Bartsch and Rehder, 1938, by original designation. Veneridae.

Psarostola Rehder, 1943. Proceedings of the United States National Museum 93(3161):198. Type species: *Columbella monilifera* Sowerby, 1844, by original designation. Columbelloidea.

Radobornia Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:140. Type species: *Radobornia araea* Dall, Bartsch and Rehder, 1938, by original designation. Kelliidae.

Rubellatoma Bartsch and Rehder, 1939. Proceedings of the United States National Museum 87(3070):130. Type species: *Rubellatoma rubella* (Kurtz and Stimpson, 1851), by original designation. Turridae.

Sigaluta Rehder, 1967. Pacific Science, 21(2):182. Type species: *Sigaluta pratensis* Rehder, 1967, by original designation. Marginellidae. [junior synonym of *Marginitella* Martens, 1904, see Harasewych and Kantor, 1991]

Siphovasum Rehder and Abbott, 1951, as a subgenus of *Vasum* Röding, 1798. Revista de la Sociedad Malacologica "Carlos de la Torre" 8(2):61. Type species: *Vasum latiriforme* Rehder and Abbott, 1951, by original designation. Turbinellidae.

Stellatoma Bartsch and Rehder, 1939. Proceedings of the United States National Museum 87(3070):132. Type species: *Stellatoma stellata* (Stearns, 1872), by original designation. Turridae.

Stenolena Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:60. Type species: *Stenolena hawaiiensis* Dall, Bartsch and Rehder, 1938, by original designation. Mytilidae.

Terua Dall, Bartsch and Rehder, 1938. Bernice P. Bishop Museum Bulletin 153:57. Type species: *Terua pacifica* Dall, Bartsch and Rehder, 1938, by original designation. Mytilidae.

Uroteuthis Rehder, 1945. Proceedings of the Biological Society of Washington 58:21. Type species: *Uroteuthis bartschi* Rehder, 1945, by original designation. Loliginidae.

Volutipysma Rehder, 1969, as subgenus of *Fulgoraria* Schumacher, 1817. Venus, The Japanese Journal of Malacology 27(4):130. Type species: *Fulgoraria (Volutipys-*

ma) humerosa Rehder, 1969, by original designation. Volutidae.

III. PUBLICATIONS OF HARALD A. REHDER

Harald A. Rehder authored 169 research papers and books over a span of 70 years (1924–1993). His first and last papers were in *The Nautilus*, a journal in which he published 55 articles. Dr. Rehder published in a broad spectrum of journals and molluscan newsletters on a wide variety of topics and taxa. While he came to be recognized as a gastropod systematist with a special interest in the families Harpidae (6 publications) and Volutidae (11 papers), Rehder began his career studying land and freshwater gastropods (20 publications). He also published on Polyplacophora, Bivalvia, Scaphopoda, and Cephalopoda, describing new taxa in each of these molluscan classes. Dr. Rehder devoted 35 publications to documenting the molluscan fauna of the tropical Pacific, and 44 papers to nomenclatural and bibliographic issues.

The following list of publications is arranged in chronological order, with dates of publication provided in square brackets [] when they could be determined. Dates of papers published in *The Nautilus* are from Coan and Harasewych (1993). Publications of the United States National Museum are dated according to Anonymous (1971).
